

BaseProxy

```
classDiagram
    class BaseProxy
    class AllProxy
    class AnyProxy
    class AttrProxy
    AllProxy --|> BaseProxy
    AnyProxy --|> BaseProxy
    AttrProxy --|> BaseProxy
```

A UML class diagram illustrating inheritance. At the top is a box labeled 'BaseProxy'. Below it are three boxes: 'AllProxy' on the left, 'AnyProxy' in the center, and 'AttrProxy' on the right. A horizontal line connects the three bottom boxes. From the center of this line, a vertical arrow points upwards to the 'BaseProxy' box, indicating that 'AllProxy', 'AnyProxy', and 'AttrProxy' all inherit from 'BaseProxy'.
